MOTOR CARRIERS - FREIGHT

1956

In 1941, the Dominion Bureau of Statistics began the collection, compilation and publication of annual statistics on motor carrier companies engaged in the "for hire" passenger bus, freight and warehousing industries. Freight operators whose annual gross revenues did not exceed \$8,000 were excluded. In 1944 returns from the companies operating public warehousing or storage facilities were used to produce a separate annual report of the "Warehousing Industry". In 1947, the "Motor Carrier" report was then expanded to include "for hire" operators with annual gross revenues of less than \$8,000 in order to obtain broader coverage.

With the publication of this report "Motor Carriers - Freight 1956" recognition is given for the first time to the distinctly different characteristics of the freight and passenger bus industries. The "Motor Carriers; Freight-Passenger" series has now been split into two series, one on passenger bus operations and the other on motor carriers - freight.

The current publication deals with the operations of freight carriers, divided into four groups according to annual gross revenues: group I consist of carriers having annual gross revenues of \$500,000 or more; group II includes firms with gross revenues of from \$100,000 to \$499,999; group III firms with annual gross revenues of from \$20,000 to \$99,999; and group IV those with less than \$20,000 per annum.

The continued cooperation of provincial authorities, trucking associations and other interested parties has resulted in gradual improvement in the statistical quality of this report although much still remains to be done. As a further step in the direction

of improved quality and more effective utilization of resources a new method was instituted in 1955 for the collection of statistics from freight carriers in the less than \$20,000 revenue group. In 1954, carriers in this group (Group IV) comprised almost 65 per cent of firms reporting but earned only slightly more than 6 per cent of total revenues. As a result a disproportionate amount of time and effort was being expended on firms which contributed little to overall industry statistics but which nevertheless were essential in order to present a true industry picture. It was therefore decided to survey firms in this group on a sample basis.

Considerations of minimum size precluded sampling the Atlantic Provinces. Sampling was also ruled out for the provinces of Saskatchewan and British Columbia where motor carrier reports are required under provincial regulations and are filed by all firms on a joint provincial - D.B.S. reporting form. The sampling technique was therefore confined to the provinces of Quebec, Ontario, Manitoba and Alberta. Use of the sampling technique permitted a more extensive follow-up procedure with the result that response was almost 100 per cent. Estimates for these provinces are obtained by blowing up sampling results by the inverse of the sampling ratio and adding data secured from new firms which fall into Group IV. The accuracy, of the data, while satisfactory, does not extend to equipment and accident data which do not appear in sufficient frequency to obtain reliable estimates and in some cases these data have been omitted from this report. Data presented in Group III have been adjusted to provide for firms which formerly appeared in Group IV but which now report revenues in excess of \$20,000.

SUMMARY - ALL CARRIERS

Table 1 presents selected data for the years 1956, 1955 and 1954 for all "for hire" freight carriers. Throughout the report it should be noted that these data are not necessarily comparable since they are based upon reports from a continually changing number of reporting firms. In addition, the total does not always include the same firms from year to year because of the rapid turnover of carriers engaged in the trucking industry. A further important reason for the changing number of reporting firms from year to year is the practice of discarding unsatisfactory reports in an attempt to improve the quality of these data. A considerable number of construction firms, contract carriers, urban transit companies, etc. have been removed from the mailing lists. Proper discarding procedures present a problem because a great many freight carriers do not adequately describe their business operations, and provincial registration records do not provide sufficient information to identify the type of business carried on by each firm.

This report is therefore produced from satisfactory returns received from 2,531 freight carriers as compared with 2,681 in 1955 and 2,411 in 1954.

The total cost of property, vehicles, etc. amounted to \$162.4 million, an increase of \$18.1 million or 12.6 per cent over the 1955 total of \$144.3 million and \$46.0 million or 39.5 per cent above 1954. Total revenue rose to \$233.5 million as compared with \$220.0 million in 1955 and \$181.5 million in 1954 while total operating expenses climbed to \$215.2 million against \$203.5 million and \$169.1 million respectively. As a result net operating revenue increased to \$18.3 million from \$16.5 million in 1955 and \$12.5 million in 1954. The average number of employees engaged by the four freight carrier groups totalled 24,733 whose earnings grossed \$84.4 million. In 1955 the number of employees averaged 23,518 with earnings of \$78.2 million and 20,284 with wages and salaries of \$65.0 million in 1954. Working proprietors decreased in number to 2,342 in 1956 from 2,477 in 1955 but increased from the 1954 total of 2,177.

SUMMARY — GROUPS I, II AND III CARRIERS ONLY

A total of 871 Canadian freight carrier firms whose gross annual revenues were \$20,000 or more during 1956 reported a total cost of property, motor vehicles, etc., amounting to \$152.6 million. In comparison 912 carriers reported an investment figure of \$132.7 million in the previous year. Operating revenues of groups I, II and III carriers rose 7.8 per cent to \$222.4 million in 1956 from \$206.3 million in the preceding year while operating expenses increased to \$207.0 million from \$192.7 million. As a result, net operating revenues increased 14.2 per cent to \$15.5 million from \$13.5 million.

The number of tons of freight carried in 1956 aggregated 22.6 million tons in contrast to 24.0 million tons a year earlier. The carriers consumed 61.0 million gallons of gasoline, 11.6 million gallons of diesel oil and 0.5 million gallons of liquefied petroleum gases. This compares with fuel

consumption of 61.9 million gallons of gasoline, 8.7 million gallons of diesel oil and 0.5 million gallons of liquefied petroleum gases in 1955.

An average of 23,828 persons were employed during the year 1956 and earned wages totalling \$83.1 million for an average of \$3,487 per annum. A year earlier an average of 22,338 earned a total of \$76.5 million or an average annual wage of \$3,422.

Equipment in the service of the freight operators consisted of 6,678 trucks, 6,323 road tractors, 10,579 semi-trailers, 379 full trailers and 53 buses. Ninety-four trucks, 1,355 road tractors and one bus were equipped with diesel engines.

Accidents involving freight carriers in Canada resulted in the death of 58 persons and injury to another 565 during 1956.

TABLE 1. Historical Summary, 1954-1956

		All carriers (Groups I, II, III and IV) ¹

MOTOR CARRIERS - FREIGHT

1957

This publication deals with the operations of freight carriers, divided into four groups according to annual gross revenues: group I consists of carriers having annual gross revenues of \$500,000 or more; group II includes firms with gross revenues of from \$100,000 to \$499,999; group III firms with annual gross revenues of from \$20,000 to \$99,999; and group IV those grossing less than \$20,000 per annum.

The continued cooperation of provincial authorities, trucking associations and other interested parties has resulted in gradual improvement in the statistical quality of this report although much still remains to be done. As a further step in the direction of improved quality and more effective utilization of resources a new method was instituted in 1955 for the collection of statistics from freight carriers in the less than \$20,000 revenue group. In 1954, carriers in this group (Group IV) comprised almost 65 per cent of the number of firms reporting but earned only slightly more than 6 per cent of total revenues. As a result, a disproportionate amount of time and effort was being expended on firms which contributed little to overall industry statistics but which nevertheless were essential in order to present a true industry picture. It was therefore decided to survey firms in this group on a random sample basis.

Considerations of minimum size precluded sampling the Atlantic Provinces. Sampling was also ruled out for the provinces of Saskatchewan and British Columbia where motor carrier reports are required under provincial regulations and are filed by all firms on a joint provincial-D.B.S. reporting form. The sampling technique was therefore confined to the provinces of Quebec, Ontario, Manitoba and Alberta. For each of these provinces, a list was prepared of firms which had previously reported into group IV and from this list a random sample selected, the sample size in each case being largely determined on the basis of revenue variance. Use of the sampling technique permitted a more extensive follow-up procedure with the result that response was almost 100 per cent. Estimates for these provinces are obtained by blowing up sampling results by the inverse of the sampling ratio and adding data secured from new firms which fall into Group IV. The accuracy, of the data, while satisfactory, does not extend to equipment and accident data which do not appear in sufficient frequency to obtain reliable estimates and in some cases these data have been omitted from this report. Data presented in Groups II and III have been adjusted to provide for firms which formerly appeared in Group IV but which now report revenues in excess of \$20,000.

SUMMARY - ALL CARRIERS

Table 1 presents selected data for the years 1957, 1956 and 1955 for all "for hire" freight carriers. Throughout the report it should be noted that these data are not necessarily comparable since they are based upon reports from a continually changing number of reporting firms. In addition, the total does not always include the same firms from year to year because of the rapid turnover of carriers engaged in the trucking industry. A further important reason for the changing number of reporting firms from year to year is the practice of discarding unsatisfactory reports in an attempt to improve the quality of these data. A considerable number of construction firms, contract carriers, urban transit companies, etc. have been removed from the mailing lists. Proper discarding procedures present a problem because a great many freight carriers do not adequately describe their business operations, and provincial registration records do not provide sufficient information to identify the type of business carried on by each firm.

This report is therefore produced from satisfactory returns received from 2,062 freight carriers as compared with 2,531 in 1956 and 2,681 in 1955.

The total cost of property, vehicles, etc. amounted to \$180.3 million, an increase of \$17.9 million or 11.0 per cent over the 1956 total of \$162.4 million and \$36.0 million or 24.9 per cent above 1955. Total operating revenues rose to \$259.1 million as compared with \$233.5 million in 1956 and \$220.0 million in 1955 while total operating expenses climbed to \$244.8 million against \$215.2 in 1956 and \$203.5 million respectively. As a result net operating revenue decreased to \$14.2 million from \$18.3 million in 1956 and \$16.5 in 1955. The average number of employees engaged by the four freight carrier groups totalled 26,338 whose earnings grossed \$97.5 million. In 1956 the number of employees averaged 24,733 with earnings of \$84.4 million and 23,518 with wages and salaries of \$78.2 million in 1955. Working proprietors decreased in number to 1,786 from 2,342 in 1956 and 2,477 in 1955.

SUMMARY—GROUPS I, II AND III CARRIERS ONLY

A total of 768 Canadian freight carrier firms whose gross annual revenues were \$20,000 or more during 1957 reported a total cost of property, motor vehicles, etc., amounting to \$170.5 million. In comparison 871 carriers reported an investment figure of \$152.6 million in the previous year. Operating revenues of groups I, II and III carriers rose 11.4 per cent to \$247.7 million in 1957 from \$222.4 million in the preceding year while operating expenses increased to \$235.9 million from \$207.0 million. As a result, net operating revenue decreased 23.9 per cent to \$11.8 million from \$15.5 million in 1956.

The number of tons of freight carried in 1957 aggregated 21.2 million tons in contrast to 22.6 million tons a year earlier. The carriers consumed 63.4 million gallons of gasoline, 11.7 million gallons of diesel oil and 0.1 million gallons of liquefied petroleum gases. This compares with fuel consumption of 61.0 million gallons of gasoline,

11.6 million gallons of diesel oil and 0.5 million gallons of liquefied petroleum gases in 1956.

An average of 25,347 persons were employed during the year 1957 and earned wages totalling \$95.6 million for an average of \$3,771 per annum. A year earlier an average of 23,828 earned a total of \$83.1 million or an average annual wage of \$3,487.

Equipment in the service of the freight operators consisted of 6,772 trucks, 8,084 road tractors, 11,466 semi-trailers, 296 full trailers and 71 buses. Sixty trucks, 1,538 road tractors and one bus were equipped with diesel engines. One truck and nine road tractors consumed liquefied petroleum gases.

Accidents involving freight carriers in Canada resulted in the death of 76 persons and injury to another 438 during 1957.

MOTOR CARRIERS - FREIGHT

(Common and Contract)

1958

This publication presents the operations of the for-hire, common and contract, intercity motor carriers of freight. For the first time contract carriers are included in the annual survey. Statistics of the common and contract carriers are shown separately in four groups according to annual gross revenues: group I consists of carriers having annual gross revenues of \$500,000 or more; group II includes firms with gross revenues from \$100,000 to \$499,999; group III firms with annual gross revenues from \$20,000 to \$99,999; and group IV, those grossing less than \$20,000 per annum. The report of each carrier is included in the statistics of the province in which its head office is located.

The continued cooperation of provincial authorities, trucking associations and other interested parties has resulted in steady improvement in the statistical quality of this report, although there is still more to be done.

For the 1958 survey, forms were mailed early in 1959 to the holders of public service vehicle and other licences which permitted public freight carrier operation. As might be expected, not all firms included in the survey cooperated by returning completed schedules. Of the schedules which were

returned some were not satisfactorily filled out and others were not used because the reporting companies were operating predominantly as private or urban carriers, which are excluded from this publication.

The property account section of this report has been extended for groups I, II and III carriers to show asset and liability information. Tables have also been added to show licence fees paid by carriers and taxes on gasoline and diesel oil. The revenue equipment tables show vehicles, both owned and leased, according to model year instead of by weight group as in previous years.

Prior to 1956 the statistics of the freight and passenger bus industries were combined in the "Motor Carriers, Freight-Passenger" series. From that year there have been separate "Passenger Bus Statistics" and "Motor Carriers-Freight" reports. In 1956 and 1957, passenger bus statistics of firms predominantly involved in the carriage of freight were included in the "Motor Carriers-Freight" reports. All references to passenger bus operations have been omitted from this report, except passenger bus revenues which are included in the "Other Revenue" accounts.

SUMMARY — ALL CARRIERS

Table 1 presents comparative data on common carriers for the years 1958, 1957 and 1956, on contract carriers for 1958 and a total of both groups for 1958. The 1958 reporting schedules asked carriers to state whether they were predominantly engaged in common or contract carrier business. Out of a total of 4,699 usable returns, 3,510 were received from firms which indicated that they were predominantly common carriers. This figure has to be reconciled with 2,062 usable returns in 1957 and 2,531 in 1956. For groups I and II common carriers (with operating revenues over \$100,000) there is reasonable comparability with the number of returns received in the three years: 1958, 341; 1957, 324; 1956, 299. The substantial increase therefore has come from the smaller common carriers. This may be accounted for by a number of facts. Firms which were previously excluded because they were thought to be contract carriers, were able to state specifically on the redesigned questionnaire used in 1958 that they considered themselves common carriers. Certain carriers of farm produce and carriers serving construction and oilfield operations which were previously excluded, have been included in this report, in many cases as common carriers if they have so designated themselves. It is also the case that response rates have improved following an intensive follow-up and tracer programme.

The 4,699 usable returns received for 1958 from both common and contract carriers showed a total value of property amounting to \$131.5 million.

Operating revenues amounted to \$352.1 million with \$335.3 million or 95.2 per cent from intercity operations. Operating expenses totalled \$328.7 million with \$83.4 million or 25.4 per cent spent on fuel, oil and other transportation expenses (including rents and fuel tax); \$75.3 million or 22.9 per cent for wages and bonuses of drivers and helpers; \$66.3 million or 20.2 per cent for administration and other operating expenses and \$49.0 million for maintenance and garage expenses. Net operating revenue was \$23.4 million. The average number of employees was 30,844 with salaries and wages of \$121.7 million, an average of \$3,945 per employee. These carriers operated 14,896 trucks, 10,396 road tractors, 14,779 semi-trailers and 751 full trailers.

Included in this report are 3,510 common carriers and 1,189 contract carriers. Common carriers reported property valued at the end of 1958 as \$108,555,878 or \$5,338 per motor vehicle as against \$22,952,583 or \$4,631 per motor vehicle for contract carriers. Common carriers reported total operating revenues of \$292,719,406 (\$14,394 per motor vehicle), compared with \$59,361,113 (\$11,978 per motor vehicle) for contract carriers. On the other hand net operating revenue per motor vehicle was less for common carriers at \$899 as against \$1,036 for contract carriers. The net operating revenue earned for every dollar of property investment was \$0.17 for common carriers and \$0.22 for contract carriers.

SUMMARY — GROUPS I AND II — COMMON CARRIERS

A realistic comparison with the previous year may be made by comparing the operations of common carriers with an annual operating revenue exceeding \$100,000 (Groups I and II), as the numbers reporting in these two groups remained fairly constant (Table 2).

A total of 341 Canadian common carriers of freight whose annual operating revenue was \$100,000 or more during 1958 reported a total cost of property amounting to \$162.9 million as compared with 324 carriers in 1957 who reported an investment figure of \$155.5 million. Operating revenues of groups I and II common carriers rose 8.4 per cent to \$245.4 million from \$226.4 million one year earlier, while operating expenses increased to \$234.2 million from \$216.7 million in 1957. Net operating revenue increased to \$11.3 million from \$9.8 million.

An average of 22,267 persons employed during the year earned wages totalling \$92.8 million,

an average of \$4,169 per annum. A year earlier, an average of 22,838 persons earned a total of \$88.8 million or an average annual wage of \$3,886. Equipment reported in the service of groups I and II common carriers at December 31, 1958 included 5,629 (4,986 in 1957) trucks, 7,598 (7,406) road tractors, 11,697 (10,752) semi-trailers and 394 (256) full trailers. Vehicles with gasoline engines consisted of 5,426 trucks and 5,823 road tractors, compared with 4,928 trucks and 5,920 road tractors in 1957. Diesel powered vehicles numbered 203 trucks and 1,773 road tractors as against 56 trucks and 1,479 road tractors in 1957.

The consumption of both diesel oil and gasoline rose in 1958. The total consumption of diesel oil rose significantly by 46.0 per cent to 16.5 million from 11.3 million gallons, while the use of gasoline rose by 3.6 per cent to 58.1 million from 56.1 million gallons.

SUMMARY — GROUPS I, II AND III CONTRACT CARRIERS

Reports were received from 455 contract carriers with revenues exceeding \$20,000 in 1958. These indicated that the value of property totalled \$19.3 million. Operating revenues amounted to \$52.8 million and expenses totalled \$49.4 million, leaving a net operating revenue for this segment of the industry at \$3.4 million.

The contract carriers reported that their vehicles consumed 16.3 million gallons of gasoline, 1.8 million gallons of diesel fuel and 19,000 gallons of liquefied petroleum gases. A total of \$3.8 million

was paid in taxes, including \$1.9 million on gasoline, \$0.2 million on diesel oil and \$1.6 million for licences.

There was an average of 4,362 employees engaged during the year who were paid \$17.0 million in salaries and wages. Drivers and helpers numbered 3,117 and their compensation was \$11.6 million or 68 per cent of the total wages. Revenue equipment reported for December 31, 1958 consisted of 2,182 trucks, 1,676 road tractors, 1,926 semi-trailers and 134 full trailers.

MOTOR CARRIERS - FREIGHT

(Common and Contract)

1959

This publication presents the operations of the for-hire, common and contract, intercity motor carriers of freight. Statistics of the common and contract carriers are shown separately in four groups according to annual gross revenues: group I consists of carriers having annual gross revenues of \$500,000 or more; group II includes firms with gross revenues from \$100,000 to \$499,999; group III firms with annual gross revenues from \$20,000 to \$99,999; and group IV, those grossing less than \$20,000 per annum. The report of each carrier is included in the statistics of the province in which its head office is located.

For the 1959 survey, forms were mailed early in 1960 to the holders of public service vehicle and other licences which permitted public freight carrier operation. As might be expected, not all firms included in the survey co-operated by returning completed schedules.

No estimate can be made of the proportion of the industry covered by the companies included in this publication as the total number of for-hire intercity motor carriers is not known. All that is known is the number of companies which obtained a vehicle licence permitting public freight carriage. In some provinces carriers operating in urban areas obtain the same licence as intercity operators. Companies which do operate as intercity carriers may earn the predominant portion of their income in some other way such as in urban cartage or private carriage. If, as is quite often the case, these companies cannot provide separate statistics for their intercity and

rural for-hire carriage operations they are excluded from the report. Also, since this report is intended to cover the Canadian for-hire intercity motor carrier industry, firms which obtain the bulk of their revenue in the United States and are unable to give separate data for their Canadian operations are excluded. Therefore, if a company does not file a return, it is not known whether that company can be considered a motor carrier for the purposes of this report.

Prior to 1956 the statistics of the freight and passenger bus transportation industries were combined in the "Motor Carriers, Freight-Passenger" series. Since that year there have been separate "Passenger Bus Statistics" and "Motor Carriers-Freight" reports. Firms which were engaged in both types of operation were allocated to the appropriate report on the basis of the predominant source of their operating revenues. In 1956 and 1957 passenger bus data of firms primarily involved in the carriage of freight were included in the "Motor Carriers-Freight" reports. All references to passenger bus operations have been omitted from the reports for 1958 and 1959 except passenger bus revenues which have been included in the "Other Revenue" accounts.

The continued co-operation of respondents, provincial authorities, trucking associations and other interested parties resulting in steady improvement in the statistical quality of this report is gratefully acknowledged.

SUMMARY

In 1959 total usable returns increased by 294 to 4,993 from the 4,699 received in 1958. Of the total, 3,565 were classified as common carriers and 1,428 as contract carriers as compared with 3,510 common and 1,189 contract carriers in the previous year. Two-thirds of the 294 increase in the total number of usable returns between 1958 and 1959 were group IV carriers and over one-half of the total increase were group IV contract carriers.

The increases were not spread evenly among the provinces. In some provinces the total number of usable returns for some size groups decreased, the decreases usually being more than compensated for by increases in other provinces. Many factors combine to cause these fluctuations, the more im-

portant factors being: some carriers cease operating each year while new ones enter the industry; firms may expand or contract sufficiently to move from one size group to another; up-to-date mailing lists are not always available for all provinces; since 1958 carriers have been asked to state specifically whether they were either common or contract carriers thus facilitating their allocation to the appropriate category; certain carriers of farm produce and carriers serving construction and oilfield operations which were excluded prior to 1958 are now included as they have designated themselves as either common or contract carriers; and, finally the intensive follow-up and tracer programme is continually improving the rate of response.

The 4,993 reports used in 1959 showed a total value of property amounting to \$151.3 million. Operating revenues amounted to \$421.4 million while operating expenses totalled \$387.1 million resulting in a net operating revenue of \$34.3 million. Of the total operating expenses, \$103.3 million or 26.7 per cent were spent on fuel, oil, purchased transportation and other transportation expenses (including rents and fuel tax); \$87.2 million or 22.5 per cent on wages and bonuses of drivers and helpers; \$75.7 million or 19.6 per cent on administration and other operating expenses; \$57.3 million or 14.8 per cent on maintenance and garage expenses; \$15.2 million or 3.9 per cent on insurance, claims and safety expenses; \$12.6 million or 3.2 per cent on operating licences and \$35.9 million or 9.3 per cent were charged to depreciation. The average number of employees of 35,830 earned \$143.5 million in salaries and wages, an average of \$4,005 per employee. Revenue equipment operated at the close of 1959 totalled 15,536 trucks, 11,435 road tractors, 16,428 semi-trailers and 1,023 full trailers.

Due to the different number of companies reporting in 1959 and 1958 a comparison between the two

years may best be made on a per carrier basis. The average value of property per carrier was \$30,304 at the end of 1959 as compared with \$27,986 at the end of 1958. The average total operating revenues earned per carrier amounted to \$84,402 for the year under review while average total operating expenses were \$77,532 leaving an average net operating revenue per carrier of \$6,870. For the previous year average total operating revenues earned per carrier totalled \$74,927 and average total operating expenses amounted \$69,946 thus providing an average net operating revenue of \$4,981.

Of the total operating revenues of \$421.4 million earned by all carriers in 1959, common carriers earned \$349.0 million and contract carriers \$72.4 million. Within the common carrier groupings group I carriers accounted for 70.7 per cent of the total operating revenues, group II carriers 15.4 per cent, group III carriers 8.5 per cent and group IV carriers 5.4 per cent. Group I carriers earned 29.2 per cent of total contract carrier operating revenues, group II carriers 34.8 per cent, group III carriers 24.8 per cent and group IV carriers 11.2 per cent.

TABLE 2. Summary of Groups I and II Carriers
COMMON CARRIERS

	1959	1958
Carriers reporting No.	390	341
Property account:		
Fixed assets (motor carrier business) \$	204,313,048	162,936,421
Less reserve for depreciation \$	107,140,413	80,103,451
Value at year end \$	97,172,635	82,832,970
Operating revenues:		
Freight revenues:		
Intercity and rural \$	283,827,473	234,408,011
City \$	7,483,733	4,464,266
Other revenues \$	9,233,454	6,564,655
Total operating revenues \$	300,544,660	245,436,932
Operating expenses:		
Maintenance and garage expenses \$	39,341,586	32,776,800
Wages and bonuses of drivers and helpers \$	62,713,563	53,571,565
Fuel, oil, purchased transportation and other transportation expenses (including rents and fuel tax) \$	75,109,371	58,152,247
Insurance, claims and safety expenses \$	11,299,254	9,864,249
Depreciation \$	22,164,030	18,587,717
Operating licences \$	8,682,941	7,485,653
Administration and other operating expenses \$	62,681,998	53,731,881
Total operating expenses \$	281,992,743	234,170,112
Net operating revenues \$	18,551,917	11,266,820
Working proprietors No.	64	49
Average number of employees "	26,454	22,267
Total salaries and wages \$	111,253,488	92,631,419
Equipment:		
Trucks No.	6,035	5,629
Road tractors "	8,622	7,598
Semi-trailers "	13,150	11,697
Full trailers "	578	394
Type of engine:		
Trucks:		
Gasoline "	5,909	5,426
Diesel oil "	125	203
Totals "	6,035¹	5,629
Road tractors:		
Gasoline "	6,748	5,823
Diesel oil "	1,863	1,773
Totals "	8,622²	7,598³
Fuel consumed:		
Gasoline (Imp. gal.) '000	62,810	58,076
Diesel oil (Im. gal.) "	19,401	16,508
Liquefied petroleum gases (Imp. gal.) "	37	17

¹ Includes one truck burning liquefied petroleum gas.

² Includes eleven road tractors burning liquefied petroleum gas.

³ Includes two road tractors burning liquefied petroleum gas.

Catalogue number	Title and Description	Price per copy
53-202	International Toll Bridges, Tunnels and Ferries—annual (approx. 12 pp.) Investment, revenues, expenses, traffic, employees, salaries and wages and accidents with list of facilities.....	.50
53-205	Motor Carriers—Freight (Common and Contract)—annual (approx. 43 pp.) Number of companies, investment, operating revenues and expenses, employees, salaries and wages, equipment and accidents, by provinces, by revenue groups and by type of operation75
53-206	Motor Vehicle Traffic Accidents—annual (approx. 71 pp.) Number of accidents, persons killed and injured, property damage, time, place, road conditions, etc., by provinces.....	.75
53-001	Motor Vehicle Traffic Accidents—quarterly (approx. 31 pp.) Number of accidents, persons killed and injured, property damage, time, place, road conditions, etc., by provinces. (A condensed monthly report of motor vehicle traffic accidents is published as a release in the Dominion Bureau of Statistics Daily Bulletin)	(\$2 a year) .50
53-215	Passenger Bus Statistics—annual (approx. 14 pp.) Number of companies, investment, operating revenues and expenses, employees, salaries and wages, equipment, traffic and accidents, by provinces50
53-002	Passenger Bus Statistics—Intercity and Rural—Bil. monthly (approx. 4 pp.) Number of companies, passengers carried, vehicle miles run, fuel consumed, revenue by provinces	(\$1 a year) .10
53-201	Road and Street Mileage and Expenditure—annual (approx. 15 pp.) Road and street mileages, construction, maintenance and administration expenditures on highways, bridges, ferries and urban streets, by provinces50
53-217	The Motor Vehicle: Part I—Rates and Regulations—annual (approx. 40 pp.) Size, weight and safety regulations, reciprocal highway agreements, fees, taxes and motor carrier regulations, and gasoline tax rate review, by provinces75
53-218	The Motor Vehicle: Part II—Motive Fuel Sales—annual (approx. 10 pp.) Gross and net sales of gasoline and net sales of diesel oil50
53-219	The Motor Vehicle: Part III—Registrations—annual (approx. 14 pp.) Registrations by type of vehicle, by provinces and municipalities.....	.50
53-220	The Motor Vehicle: Part IV—Revenues—annual (approx. 11 pp.) Provincial government revenues from registrations and gasoline taxes; and unsatisfied judgment fund data, by provinces50
53-216	Urban Transit—annual (approx. 20 pp.) Investment, revenues, expenses, passengers carried, vehicle miles run, fuel consumed, by electric car, trolley coach and motor bus; equipment, accidents, employees, salaries and wages50
53-003	Urban Transit—Bil. monthly (approx. 4 pp.) Number of companies, passengers carried, vehicle miles run, fuel consumed, and revenue by electric car, trolley coach and motor bus, by provinces	(\$1 a year) .10
53-004	Motor Transport Traffic: National Estimates—quarterly (approx. 12 pp.) Mileage, ton miles, weight of goods carried and revenues by commodity for for-hire and private intercity carriers	(\$2 a year) .50

Motor Transport Traffic

Each of the following series of eight annual reports provides statistics on mileage, fuel consumption, truck capacity, goods carried, ton miles, revenues and number of trucks by type of operation and gross vehicle weight groups.

53-207	Motor Transport Traffic: National Estimates (approx. 30 pp.)75
53-208	Motor Transport Traffic: Atlantic Provinces (approx. 18 pp.)50
53-209	Motor Transport Traffic: Quebec (approx. 12 pp.)50
53-209F	Transports Routiers de Marchandises: Québec (approx. 12 pp.)50
53-210	Motor Transport Traffic: Ontario (approx. 13 pp.)50
53-211	Motor Transport Traffic: Manitoba (approx. 13 pp.)50
53-212	Motor Transport Traffic: Saskatchewan (approx. 13 pp.)50
53-213	Motor Transport Traffic: Alberta (approx. 14 pp.)50
53-214	Motor Transport Traffic: British Columbia (approx. 13 pp.)50

INTRODUCTION

The following changes in the publication of data relating to the intercity for hire motor carrier and public warehousing industries should be noted:

Prior to 1960, firms engaged in both trucking and public warehousing activities were required to file separate returns to cover each operation. However, a breakdown of financial data was not usually available. Firms were therefore allocated to a report on the basis of the predominant source of their annual gross operating revenues. Data for companies which obtained the majority of their operating revenues from for hire intercity trucking were contained in the report "Motor Carriers—Freight", catalogue no. 53-205, while statistics for firms engaged primarily in public warehousing were published in the "Warehousing" report, catalogue no. 63-212.

The majority of companies having both for hire trucking and public warehousing operations were found to be engaged primarily in household goods moving and storage. As this activity, requiring specialized equipment, is considered to be a distinct industry, it was decided to present such information in a separate publication to be called "Moving and Storage, Household Goods", catalogue no. 53-221. With the exclusion of household goods movers from the "Motor Carriers—Freight" report, the title of this report should be more appropriate and the data contained in it more meaningful. As firms earning the predominant portion of their annual gross operating revenues from household goods storage are no longer contained in the "Warehousing" report its title has been changed to "Warehousing, General Merchandise and Refrigerated Goods", catalogue no. 63-212, to indicate more clearly what it contains.

The improvement in the presentation of data pertaining to for hire trucking and ^{urban} warehousing described above is part of a continuing programme to increase the usefulness, coverage and accuracy of statistics relating to the various industries in the field of road transport.

Over the past several years a number of other changes have been made. The more important of these was the separation of motor carrier freight and passenger bus statistics into two separate industry publications in 1956. In 1958 this report, covering the operations of common carriers of freight only, was expanded to include contract carriers thus presenting statistics for the complete for hire trucking industry. Common carriers are defined as those which hold themselves out to the general public to engage in the transport of property over regular or irregular routes. Contract carriers

are those under continuing contracts, with one or a limited number of persons, either for the furnishing of transportation service through the assignment of motor vehicles for a continuing period of time, to the exclusive use of each person served or for the furnishing of transportation services designed to meet the distinct need of each individual customer.

In 1960 a revised "Classification of Financial Accounts of Motor Carriers of Freight in Canada" was issued by the Dominion Bureau of Statistics. This classification was revised and distributed to the carriers with the assistance of the Canadian Trucking Associations and its provincial affiliates. The financial sections of the 1960 reporting schedule were then amended to conform with the uniform classification.

For the purposes of this report, motor carriers of freight have been classified into four revenue groups on the basis of gross annual operating revenues.

Gross operating revenues	
Group 1	\$500,000 and over
" 2	\$100,000 to \$499,999
" 3	\$20,000 " \$99,999
" 4	under \$20,000

For the 1960 survey, forms were mailed early in 1961 to the holders of public service vehicle and other licences which permitted public freight operation. Although not all firms deriving revenue from the intercity carriage of freight are included in this report, the coverage is considered representative of the industry. Factors accounting for incomplete coverage are:

1. Carriers sometimes do not respond.
2. Carriers sometimes file returns too incomplete to be used.
3. Firms engaged predominantly in urban cartage or some other industry e.g. construction, which cannot provide separate statistics for their intercity motor carrier operations are excluded.
4. Carriers operating predominantly in the U.S.A. which cannot provide separate statistics for their Canadian operations are excluded.
5. Provincial mailing lists are not always comprehensive.

The exclusion of household goods movers from the "Motor Carriers—Freight" report has resulted in a break in the continuity of the data. As a means of linking the 1960 report with 1959 the following statistics of 98 firms included in the 1959 "Motor Carriers—Freight" report but now contained in the report "Moving and Storage, Household Goods" are provided below:

	1960	1959
FirmsNo.	98	98
Fixed assets \$	13,510,467	12,161,652
Intercity revenue \$	9,316,160	11,546,327
Total revenues \$	21,071,828	19,505,476
Total expenses \$	20,200,104	18,927,693
Revenue equipment:		
TrucksNo.	858	849
Tractors "	454	433
Semi-trailers "	462	441
Full trailers "	20	11

Summary

The following highlights of the for hire trucking industry are presented to provide a concise statistical picture of its size and relative importance.

Carriers reporting No.	4,992
Total property account (after depreciation)..... \$	150,000,000
Total operating revenues..... \$	415,900,000
Total operating expenses \$	390,400,000
Net operating revenues \$	25,500,000
Average number of employees	33,178

1. Amalgamations.
2. Births and deaths in the industry.
3. Changes from one type of for hire carrier to another, such as from contract to common and vice versa.
4. Changes from one revenue group to another due to business conditions.
5. Improvements in response due to the intensive follow-up and tracer program.

It should also be noted that the necessity of allocating interprovincial carriers according to the location of their head office distorts provincial totals to some extent.

The Dominion Bureau of Statistics gratefully acknowledges the continued co-operation of respondents, provincial authorities, trucking associations and other interested parties which has resulted in the steady improvement of the statistical quality of this report.

Equipment:

Trucks	No.	14,816
Road tractors.....	"	11,526
Semi-trailers	"	17,417
Full trailers.....	"	678

Although carriers earning more than \$20,000 annually in gross operating revenue represented a minority of the total number of firms in the industry they accounted for the vast majority of the revenues earned. This is especially true in the common carrier segment as shown in the table below:

Distribution of Gross Annual Operating Revenues by Size of Carrier

Group	Common carriers				Contract carriers				All carriers			
	Number	Per cent	Operating revenues	Per cent	Number	Per cent	Operating revenues	Per cent	Number	Per cent	Operating revenues	Per cent
			\$ millions				\$ millions				\$ millions	
I	126	3.7	257.7	73.4	18	1.2	18.9	29.2	144	2.9	276.6	66.5
II	228	6.7	48.5	13.8	100	6.3	19.3	29.8	328	6.5	67.8	16.3
III	584	17.1	26.0	7.4	383	24.2	17.0	26.3	967	19.4	43.0	10.3
IV	2,472	72.5	19.0	5.4	1,081	68.3	9.5	14.7	3,553	71.2	28.5	6.9
Totals	3,410	100.0	351.2	100.0	1,582	100.0	64.7	100.0	4,992	100.0	415.9	100.0

Household goods movers and some public warehousing companies earn revenues from intercity cartage. Statistics of these firms are included in the reports "Moving and Storage, Household Goods" and "Warehousing, General Merchandise and Refrigerated Goods" and are not included in the tables of this publication. However, to present a more complete picture of intercity motor carrier revenues, their earnings from this source are contained in the summary below together with the inter-

city revenues of the motor carriers of freight contained in this report.

Summary of Intercity Revenues, 1960

Motor carriers of freight	\$401,396,821
Household goods movers.....	14,138,283
General merchandise and refrigerated warehouses	932,084
Total intercity revenues	416,467,188
